

Reg Hooper MBE

What he has given me - and the World!

Robert F. Beck - for Reg's funeral 18th June 2012

Just before Christmas, the pain in my lumber region and kidney were so bad that I had to lay down rather than sit, and the pain was on one occasion so bad that I threw up with it for the first time that I can remember.

I was soon to be diagnosed with advanced prostate cancer, which had spread to my pelvis, spine, lymph nodes, ureter, liver, lung and one rib. It was a death sentence 30 years after God had told me to be a light to His sheep for 30 years, as interpreted as a result of reading of an amazing miracle and prophesy in this book: *The Happiest People on Earth*, not long before.

Because Reg Hooper had given me that book, my long struggle to find faith gained an impetus that was to help me make sense of apparent contradictions in the Bible, and continue my search for truth that had been complicated via my love of science. It helped me to overcome the anxiety and panic attacks at the time, which were ruining my life, but in 2003 something far more amazing was about to happen.

After my own fallibility became apparent, I decided to trust God completely instead. The long and wonderful story of how God then revealed science of huge consequence, that I know unifies relativity, quantum mechanics and string theory, but more importantly demonstrates that the spiritual realm is real, is in my autobiography that is free to read on my website. Put Robert F. Beck into Google and you will soon find www.einsteins-revolution.com (the F is important) or ask me for a card.

So Reg Hooper gave me something that I rate beyond not millions, not billions, not even trillions of pounds, but beyond that, without exaggeration, because the science that God has revealed to me explains technologies that can stop world wide conflicts over dwindling water, food and energy resources; and for me the knowledge I have now is infinitely beyond financial value.

It is even more valuable than the other wonderful thing that stems from the fateful day that Reg gave me that book, which has been the faith and knowledge that has enabled me to sit for many hours writing papers that can change the world, and driving here to tell you that the amazing story of my healing, which includes angelic intervention, is also on my website, with further evidence of the fact that we have scientifically explainable, eternal souls.

Praise God for this astonishing legacy that stems from the great faith of Reg Hooper!
